Project [4949, Mr. Green Africa & Removall: Plastic waste reduction project in Kenya]: Plastic Registration request denied

Dear Davidson, Yunia and Côme,

Verra has not accepted the above project request. A new request can be submitted as described below. In the meantime, the project status has been updated to Registration request denied in the Plastic Program. The procedure for project request denial and submission of a new request is described in Section 4.3, *Registration and Issuance Process, v4.5*, referenced in Correction 1 in *Corrections and Clarifications to the Plastic Program Rules and Requirements*.

Verra has deemed that the validation/verification body (VVB) has not appropriately assessed, nor fully described how it has assessed, the project's conformance with the Plastic Program rules. The project documentation is therefore deemed incomplete, of insufficient quality, and/or does not conform with the program rules. Verra has shared further details with you separately.

Next steps

The VVB must address the issues identified. The project proponent/ authorized representative may then submit a new project request, as follows:

1. Upload the revised project documents to the Verra Registry,
2. Submit a new project request via email to registry@verra.org.

The new request will be processed according to Section 4.3.1, *Registration and Issuance Process, v4.5*.
The project will be rejected if a new request is not submitted within one year of this letter.

This letter will be made public on the Verra Registry.

Sincerely,

Neha Rao
Director, Energy & Industrial Projects
Verra
